

# Social Responsibility Statement

There is nothing more important than the safety of our employees and the protection of our environment- no task, no deadline, no service is so urgent that we would place our people, our customers, and our community at risk.

OES is totally committed to fostering a safe, secure and healthy workplace for our people, our customers, partners, and suppliers with a reinforcing commitment to preserve our environment.

OES business operations will be conducted in compliance with all applicable environmental, health and safety regulatory, corporate and customer requirements. We will mitigate safety and environmental risks, prevent injury, illness and pollution, as well as conserve resources.

OES will foster a safety awareness culture that is embraced by all employees to enable a workplace that is free of hazards, accidents and occupational illnesses. OES is committed to the continual improvement of its processes and services through the implementation and maintenance of our EHS programs and systems.

Every OES employee has an individual responsibility to understand, comply with and uphold all applicable environmental, health and safety policies and to actively participate in the Company EHS programs to ensure compliance.
